## Education

---

The Ohio State University; Columbus, OH  
PhD Candidate in Evolution, Ecology and Organismal Biology; 2016-Present  
Advisors: H. Lisle Gibbs and Bryan Carstens

Central Michigan University; Mt. Pleasant, MI  
M.S. Biology, Conservation Focus; 2014 – 2016  
Advisor: Andrew Mahon

Hope College; Holland, MI  
B.S. Biology; 2009 - 2013  
Advisor: Tom Bultman

## Research Experience

---

2016 – Present The Ohio State University; PhD Dissertation

Advisors: H. Lisle Gibbs and Bryan Carstens

Assessing the use of biomarkers for sourcing migratory tree bats killed at wind farms

Research objectives

- Determine the validity of using trace elements to source tree bats
- Combine multiple different markers in a statistically sound method to better find origin of tree bats
- Apply previous methods to bats killed at wind farms in Ohio

Application of repurposed data to answer new and interesting questions

Research objectives

## Jamin G. Wieringa

- Use occurrence data from the Global Biodiversity Information Facility (GBIF) to create seasonal species distribution models
- Better understand cryptic diversity in mammals using GBIF and GenBank
- Understand the phylogeographic history of the Southeast US using repurposed data

Assemble and use genomes of *Lasionycteris noctivagans*

Research objectives

- Assess population structuring using mitochondrial genomes (undergraduate research project)
- Use nuclear genomes to better understand evolution of *L. noctivagans*

2014 – 2016 Central Michigan University; Master's Thesis

Advisor: Dr. Andrew Mahon

Assessment of diet, population viability, and location of an invasive grass carp population in the Western Basin of Lake Erie

Research objectives

- Determine the reproductive status of a population in the Michigan water of Lake Erie through the determination of ploidy
- Study the diet composition of grass carp
- Use environmental DNA to determine the current locations of populations in the Western basin
- Work closely with management personnel from the Michigan DNR

2010-2013 Hope College

Advisor: Tom Bultman

Effects of alkaloids produced from an endophytic fungus on aphid survival and parasitoid wasp host selection; Lab Volunteer

Research objectives

- Studied the interactions of *Neotyphodium*, aphids, and a parasitic wasp.
- Researched the interactions of alkaloids released by the endophytic fungus and the effect on aphid population, and then aphid selection by parasitoids.
- It was found that the aphid favored feeding on plants with the endophyte since it reduced the rate of parasitism.

Determination of stimuli that elicit the production of alkaloids by an endophytic fungus;

Independent Research

Research Objectives

- Studied the interaction of *Neotyphodium* and *Lolium arundinaceum*.

## Jamin G. Wieringa

- Researched the signaling mechanism that *Neotrypheidium* reacts to, to increase the production of alkaloids.

### Publications

---

**Wieringa, J.G.**, Herbst, S.J., Mahon, A.R. 2017. The reproductive viability of Grass Carp, *Ctenopharyngodon idella*, in the western basin of Lake Erie. *Journal of Great Lakes Research*. 43(2): 405-409

Evans, N. T., Shirey, P. D., **Wieringa, J. G.**, Mahon, A. R., & Lamberti, G. A. 2017. Comparative Cost and Effort of Fish Distribution Detection via Environmental DNA Analysis and Electrofishing. *Fisheries* 42(2): 90–99

### Grants & Awards

---

2017: Competitive State Wildlife Grant. Co-wrote on “Using novel biomarkers to assess geographic scale and demographic impacts on three species of tree-roosting bats killed at wind turbines” July 2017 – July 2020. H. Lisle Gibbs and Bryan Carstens are the PI’s.

### Presentations

---

**Wieringa JG.** Lost in the Night: Insights in to the Movements of Migratory Tree Bats. 2019. *Hope College*. Invited Seminar. Holland, MI.

**Wieringa JG,** Carstens, BC, Gibbs, HL. Atmospheric Mercury as a Method of Sourcing Migratory Tree Bats. 2018. *The Wildlife Society Annual Conference*. Presentation. Cleveland, OH.

**Wieringa, J.G.** and Bultman, T. L. November 2012. Role of Plant Damage in Signaling the Production of Alkaloids by an Endophytic Fungus, *Neotybodium*. *West Michigan Regional Undergraduate Science Research Conference*. Poster. Grand Rapids, MI.

## Professional Development

---

### Reviewer

Molecular Ecology 2017-Present

## Service

---

### Graduate Student Groups

The Ohio State University, Graduate Evolution and Ecology Students

- Seminar Committee Co-chair 2017-2018
- Graduate Studies Representative 2018-2019
- President 2019-Present

Central Michigan University. Biology Graduate Student Association

- Social Chair 2015-2016

## Professional Associations

---

- American Association for the Advancement of Science
- Society for Integrative and Comparative Biology
- American Society of Mammalogists
- The Wildlife Society
